

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A bag comprising:

a bag body defining therein a compartment accessible through an opening at one end of the bag body; and

secured to the bag body along one edge thereof and extending therefrom to a free distal end, a flexible strap of width sufficient to span at least a majority of the compartment, the strap carrying an array of fastener elements on an opposite side thereof, each fastener element having a stem extending integrally from a band of resin extending across the strap[[]],

wherein the opening is a side opening facing the strap, the strap being of sufficient length to wrap about an object, with the strap overlapping the bag body to engage exposed fibers of the bag with the fastener elements, to secure the bag to the object with the strap extending across the side opening.

2. (Previously Presented) The bag of claim 1 wherein the band of resin encapsulates surface features of the strap to form an inseparable laminate.

3. (Previously Presented) The bag of claim 1 wherein the band of resin is an integral region of the strap, the strap being a unitary sheet of the resin and extending beyond the array of fastener elements.

4. (Previously Presented) The bag of claim 1 wherein the strap extends beyond the edge of the bag body a distance greater than about twice a width of the bag body measured from the same edge in opposite direction.

5. (Previously Presented) The bag of claim 1 wherein the strap consists essentially of a sheet of loop material with the band of resin extending thereacross.

6. (Previously Presented) The bag of claim 1 wherein the bag body is secured to the strap along multiple edges of the bag body.

7. (Previously Presented) The bag of claim 1 wherein the strap is an integral extension of one side of the bag body.

8. (Previously Presented) The bag of claim 1 wherein the bag body includes a releasable closure extending along the opening.

9. (Previously Presented) The bag of claim 8 wherein the closure comprises a rib-and-groove closure.

10. (Previously Presented) The bag of claim 8 wherein the closure comprises a touch fastener closure.

11. (Cancelled)

12. (Cancelled)

13. (Previously Presented) The bag of claim 1 wherein the strap is resiliently stretchable in a longitudinal sense.

14. (Previously Presented) The bag of claim 1 wherein the fastener elements are disposed in a discrete band adjacent the free end of the strap.

15. (Previously Presented) The bag of claim 14 wherein the discrete band is continuous and extends across the width of the strap.

16. (Previously Presented) The bag of claim 14 wherein the strap includes a graspable, non-fastening region at its free end, beyond the band of fastener elements.

17. (Previously Presented) The bag of claim 1 wherein the compartment is defined fully within the width of the strap, such that the strap envelops the compartment when overlapped across the bag body.

18. (Currently Amended) A method of releasably securing one or more relatively small components to a relatively larger object, the method comprising placing the components in the compartment of a wrap-bag according to claim 1; and

wrapping the wrap-bag about the object in overlapping manner with the strap extending across the side opening, and releasably securing the fastener elements of the wrap-bag to the fibers of the wrap-bag, to hold the wrap-bag to the object.

19. (Previously Presented) The method of claim 18 wherein the relatively large object is a chassis, and the components are to be later assembled to the chassis.

20. (Previously Presented) The method of claim 18 wherein the relatively large object is to be detonated, and the components comprise one or more explosive charges.
